Journal of ATMOSPHERIC AND SOLAR-TERRESTRIAL PHYSICS

List of Contents and Author Index
Volume 60, 1998

Editor-in-Chief: Michael J. Rycroft
North American Editor-in-Chief: Timothy L. Killeen

Published in Association with the International Union of Radio Science

U.R.S.I.

Pergamon

LIST OF CONTENTS

Number 1

P. Laut and **J. Gunderman:** Does the correlation between solar cycle lengths and Northern hemisphere land temperatures rule out any significant global warming from greenhouse gases? 1

P. B. C. Ren: Effects of the atmosphere on satellite-retrieved snowfield surface temperature 5

K. Parameswaran, R. Rajan, G. Vijayakumar, K. Rajeev, K. Krishna Moorthy, P. R. Nair and **S. K. Satheesh:** Seasonal and long term variations of aerosol content in the atmospheric mixing region at a tropical station in the Arabian sea-coast..... 17

J. L. Baray, G. Ancellet, F. G. Taupin, M. Bessafi, S. Baldy and **P. Keckhut:** Subtropical tropopause break as a possible statosphere source of ozone in the tropical troposphere.... 27

R. D. Palmer, M. F. Larsen, S. Fukao and **M. Yamamoto:** On the relationship between aspect sensitivity and spatial interferometric in-beam incidence angles..... 37

D. A. Hooper and **L. Thomas:** Complementary criteria for identifying regions of intense atmospheric turbulence using lower VHF radar 49

M. Ruiping, Z. Feng and **M. Xiangming:** A special oscillation of zonal mean temperatures of the middle atmosphere 63

N. Mandolesi, M. R. Attolini, C. Burigana, A. Memmo, G. Morigi, G. Ventura, M. Bersanelli, L. Danese, S. Weinreb, B. Kane and **B. Partridge:** Balloon-borne measurements of the atmospheric emission near 94 GHz 71

C. Jacobi, R. Schminder and **D. Kürschner:** Planetary wave activity obtained from long-period (2-18 days) variations of mesopause region winds over Central Europe (520n, 150e) 81

V. Kharchenko, N. Balakrishnan and **A. Dalgarno:** Thermalization of fast nitrogen atoms in elastic and inelastic collisions with molecules of atmospheric gases 95

G. B. Osterman, R. A. Heelis and **G. J. Bailey:** Effects of wind-induced ionization layers on ionospheric electrodynamics 107

E. L. Afraimovich and **K. S. Palamartchouk:** Determining the velocity of the interference pattern by analyzing three mutually orthogonal projections of the radio signal field vector. I. Numerical simulation..... 115

S. P. Kuo, J. Huang and **M. C. Lee:** Parametric excitation of ion Bernstein waves by parallel-propagating Langmuir waves in a collisional magnetoplasma 121

A. Saito, T. Iyemori, L. G. Blomberg, M. Yamamoto and **M. Takeda:** Conjugate observations of the mid-latitude electric field fluctuations with the MU radar and the Freja satellite 129

Book reviews 141

Number 2

V. Bucha and **V. Bucha Jnr:** Geomagnetic forcing of changes in climate and in the atmospheric circulation 145

S. Syndergaard: Modeling the impact of the Earth's oblateness on the retrieval of temperature and pressure profiles from limb sounding 171

H. G. Mayr, J. G. Mengel and **K. L. Chan:** Equatorial oscillations maintained by gravity waves as described with the Doppler Spread Parameterization: I. Numerical experiments 181

H. G. Mayr, R. E. Hartle and **K. L. Chan:** Equatorial oscillations maintained by gravity waves as described with the Doppler Spread Parameterization: II. Heuristic analysis 201

S. V. Leontyev, A. A. Namgaladze, A. N. Namgaladze and **N. N. Bogdanov:** Thermospheric meridional winds in the vicinity of the auroral zone: observations and modelling 215

G. F. Deminova, V. M. Shashunkina and **E. E. Goncharova:** A global empirical model of effects of large-scale internal gravity waves in the night-time ionosphere 227

G. L. Gdalevich, V. F. Gubsky, N. I. Izhovkina and **V. D. Ozerov:** Observation and theory of topside ionospheric plasma inhomogeneities 247

M. Itonaga, A. Yoshikawa and **K. Yumoto:** Transient response of the non-uniform equatorial ionosphere to compressional MHD waves 253

A. J. Smith and **P. J. Jenkins:** A survey of natural electromagnetic noise in the frequency range f=1–10 kHz at Halley station, Antarctica: 1. Radio atmospherics from lightning 263

Number 3

A. Palumbo: Atmospheric tides 279

G. M. Shved, A. A. Kutepov and **V. P. Ogibalov:** Non-local thermodynamic equilibrium in CO_2 in the middle atmosphere. I. Input data and populations of the v_3 mode manifold states 289

V. P. Ogibalov, A. A. Kutepov and **G. M. Shved:** Non-local thermodynamic equilibrium in CO_2 in the middle atmosphere. II. Populations in the v_1v_2 mode manifold states 315

C. M. Hall, A. Brekke, O. V. Martynenko and **A. A. Namgaladze:** Modelling turbulent energy dissipation in the high-latitude mesosphere 331

R. S. Turek, R. G. Roper and **J. W. Brosnahan:** Further direct comparisons of incoherent scatter and medium frequency radar winds from AIDA '89 337

J. N. Y. Cho, M. P. Sulzer and **M. C. Kelley:** Meteoric dust effects on D-region incoherent scatter radar spectra 349

M. C. Kelley, C. Alcala and **J. Y. N. Cho:** Detection of a meteor contrail and meteoric dust in the Earth's upper mesosphere 359

S. Alex, B. D. Kadam and **D. R. K. Rao:** Ionospheric current systems on days of low **equatorial D*H*** 371

J. O. Adeniyi and **S. M. Radicella:** Diurnal variation of ionospheric profile parameters B_0 and B_1 for an equatorial station at low solar activity 381

A. P. Nickolaenko, G. Sátori, B. Zieger, L. M. Rabinowicz and **I. G. Kudintseva:** Parameters of global thunderstorm activity deduced from the long-term Schumann resonance records 387

Book Reviews 401

International Geophysical Calendar 1998 (Final) 409

Number 4

Review Paper
J. D. Matthews: Sporadic E: current views and recent progress 413

C. M. Hall, C. E. Meek and **A. H. Manson:** Turbulent energy dissipation rates from the University of Tromsø/University of Saskatchewan MF radar 437

S. Abraham, S. K. Dhaka, K. D. Praveen, N. Nath, O. P. Nagpal and **K. L. Baluja:** Planetary wave effect on ionospheric absorption..... 441

F. S. Kuo, H. Y. Lue and **C. L. Luo:** Physical parameters of gravity wave packet propagation contained in radar RTI plots..... 455

A. V. Shvets and **M. Hayakawa:** Polarisation effects for tweek propagation..... 461

M. L. Parkinson, P. L. Dyson, D. P. Monselesan and **R. J. Morris:** On the role of electric field direction in the formation of sporadic *E*-layers in the southern polar cap ionosphere..... 471

Book Review..... 493

Number 5

R. P. Singh, A. K. Singh and **D. K. Singh:** Plasmapheric parameters as determined from whistler spectrograms: a review 495

M. L. Parkinson and **P. L. Dyson:** Measurements of mid-latitude *E*-region, sporadic-*E*, and TID-related drifts using HF Doppler-sorted interferometry..... 509

P. R. Field, H. Rishbeth, R. J. Moffett, D. W. Idenden, T. J. Fuller-Rowell, G. H. Millward and **A. D. Aylward:** Modelling composition changes in F-layer storms 523

V. Y. Trakhtengerts and **M. J. Rycroft:** Sounding the magnetosphere by signals from VLF radio transmitters..... 545

A. K. Singh, A. K. Singh, D. K. Singh and **R. P. Singh:** The effect of temperature on the dispersion of proton whistlers..... 551

Number 6

P. R. Nair and **K. K. Moorthy:** Effects of changes in atmospheric water vapor content on physical properties of atmospheric aerosols at a coastal station 563

S. Masuelli, G. M. Caranti and **C. M. Scavuzzo:** Axisymmetric numerical study of convective cloud electrification 573

J. R. Manzano, S. M. Radicella, M. M. Zossi de Artigas, A. N. Fillippi de Manzano and..... **A. H. Cosio de Ragone:** Troposphere–ionosphere interaction during tropospheric mesoscale convective complexes events 585

G. O. L. Jones and **C. Davis:** Occurrence and characteristics of high-latitude mesospheric echoes at MF: observations by Halley and Tromso dynasondes 595

J. M. Grebowsky, R. A. Goldberg and **W. D. Pesnell:** Do meteor showers significantly perturb the ionosphere?..... 607

S. E. Milan, M. Lester, T. B. Jones and **E. M. Warrington:** Observations of the reduction in the available HF band on four high latitude paths during periods of geomagnetic disturbance... 617

R. Raghavarao, R. Suhasini, W. R. Hoegy, H. G. Mayr and **L. Wharton:** Local time variation of equatorial temperature and zonal wind anomaly (ETWA) 631

K. Kudela, I. M. Martin, F. K. Shuiskaya, M. M. Mogilevsky and **F. Jiricek:** Pulsations of precipitating energetic electrons: ACTIVE satellite data 643

C. O. Hines: Comments on the paper by C. S. Gardner, "Testing theories of atmospheric gravity wave saturation and dissipation" 655

C. S. Gardner: Reply to Hines' comments on "Testing theories of atmospheric gravity wave saturation and dissipation" 663

Numbers 7–9

SPECIAL ISSUE

EFFECTS OF THUNDERSTORM ACTIVITY ON THE UPPER ATMOSPHERE AND IONOSPHERE

D. D. Sentman: Electrical excitation of the middle and upper atmosphere by lightning: Special issue of the Journal of Atmospheric and Solar-Terrestrial Physics 667

W. L. Boeck, O. H. Vaughan Jr., R. J. Blakeslee, B. Vonnegut and **M. Brook:** The role of the space shuttle videotapes in the discovery of sprites, jets and elves 669

J. R. Winckler: Optical and VLF radio observations of sprites over a frontal storm viewed from O'Brien Observatory of the University of Minnesota 679

E. R. Williams: The positive charge reservoir for sprite-producing lightning 689

C. Gomes and **V. Cooray:** Long impulse currents associated with positive return strokes 693

D. J. Boccippio, C. Wong, E. R. Williams, R. Boldi, H. J. Christian and **S. J. Goodman:** Global validation of single-station Schumann resonance lightning location 701

E. M. Westcott, D. D. Sentman, M. J. Heavner, D. L. Hampton, O. H. Vaughan Jr.: Blue jets: their relationship to lightning and very large hailfall, and their physical mechanisms for their production 713

A. I. Sukhorukov and **P. Stubbe:** Problems of blue jet theories 725

E. M. Westcott, D. D. Sentman, M. J. Heavner, D. L. Hampton, W. A. Lyons and **T. Nelson:** Observations of 'Columniform' sprites 733

R. L. Dowden, S. F. Hardman, C. J. Rodger and **J. B. Brundell:** Logarithmic decay and Doppler shift of plasma associated with sprites 741

C. J. Rodger, J. R. Wait and **R. L. Dowden:** VLF scattering from Red Sprites—Theory 755

C. J. Rodger, J. R. Wait and **R. L. Dowden:** Scattering of VLF from an experimentally described sprite 765

L. H. Marshall, L. C. Hale, C. L. Croskey and **W. A. Lyons:** Electromagnetics of sprite- and elve-associated sferics 771

R. A. Armstrong, J. A. Shorter, M. J. Taylor, D. M. Suszcynsky, W. A. Lyons and **L. S. Jeong:** Photometric measurements in the SPRITES '95 & '96 campaigns of nitrogen second positive (399.8 nm) and first negative (427.8 nm) emissions 787

D. M. Suszcynsky, R. Roussel-Dupré, W. A. Lyons and **R. A. Armstrong:** Blue-light imagery and photometry of sprites 801

J. S. Morrill, E. J. Bucsela, V. P. Pasko, S. L. Berg, M. J. Heavner, D. R. Moudry, W. M. Benesch, E. M. Wescott and **D. D. Sentman:** Time resolved N_2 triplet state vibrational populations and emissions associated with red sprites 811

H. L. Rowland: Theories and simulations of elves, sprites and blue jets 831

Z. Ma, C. L. Croskey and **L. C. Hale:** The electrodynamic responses of the atmosphere and ionosphere to the lightning discharge 845

V. P. Pasko, U. S. Inan and **T. F. Bell:** Ionospheric effects due to electrostatic thundercloud fields 863

M. Cho and **M. J. Rycroft:** Computer simulation of the electric field structure and optical emission from cloud-top to the ionosphere 871

M. J. Rycroft and **M. Cho:** Modelling electric and magnetic fields due to thunderclouds and lightning from cloud-tops to the ionosphere 889

G. Milikh, D. A. Usikov and **J. A. Valdivia:** Model of infrared emission from sprites 895

G. Milikh, J. A. Valdivia and **K. Papadopoulos:** Spectrum of red sprites 907

R. Roussel-Dupré, E. Symbalisty, Y. Taranenko and **V. Yukhimuk:** Simulations of high-altitidue discharges initiated by runaway breakdown 917

M.-C. Lee, Y. R. Dalkir and **E. R. Williams:** Radar reflectivity of lightning-induced plasmas .. 941

R. L. Showen and **A. Slingeland:** Measuring lightning-induced ionospheric effects with incoherent scatter radar or with cross-modulation 951

R. T. Tsunoda, R. C. Livingston, J. J. Buonocore, W. A. Lyons, T. E. Nelson and **M. C. Kelley:** Evidence of a high-altitude discharge process responsible for radar echoes at 24.2 MHz.... 957

M. C. Lee, R. J. Riddolls and **D. T. Moriarty:** Laboratory study of some lightning-induced effects in the ionospheric plasma 965

Number 10

C. Gomes, V. Cooray and **C. Jayaratne:** Comparison of preliminary breakdown pulses observed in Sweden and in Sri Lanka 975

K. Krishna Moorthy, S. K. Satheesh and **B. V. Krishna Murthy:** Characteristics of special optical depths and size distributions of aerosols over tropical oceanic regions 981

E. S. Kazimirovsky and **G. K. Matafonov:** Continental scale and orographic 'structures' in the global distribution of the total ozone content 993

S. Silverman: Early auroral observations 997

M. A. Arriagada, A. J. Foppiano and **M. J. Buonsanto:** Horizontal meridional thermospheric winds over King George Island, Antarctica, during the June 1991 Geomagnetic Storm 1007

V. A. Ivanov, N. V. Ryabova, V. V. Shumaev, V. P. Uryadov, V. E. Nosov, I. G. Brinko, N. S. Mozerov: Effect of the solar eclipse of 22 July 1990 at mid-latitude path of HF propagation 1013

C. Lal: Solar wind and equinoctial maxima in geophysical phenomena 1017

D. R. Shklyar, V. Truhlík: On the modification of light ion concentration profiles above seismically active regions: a qualitative consideration 1025

G. K. Rangarajan and **T. Iyemori:** Hemispherical and latitudinal differences in the response of geomagnetic activity to recurrent solar wind streams 1035

M. A. Clilverd, T. D. G. Clark, E. Clakre and **H. Rishbeth:** Increased magnetic storm activity from 1868 to 1995 1047

Book Review 1057

Number 11

S. Teggi, M. P. Bogliolo, M. F. Buongiorno and **S. Pugnaghi:** Influence of non-representative atmospheric profiles on estimates of land surface temperature by MIVIS data using radiative transfer models 1059

K. Hocke and **K. Igarashi:** 24- and 12-h oscillations during a time of strong eastward wind in the upper mesosphere at 31° and 45°N 1071

Rapid Communication
K. Hocke and **K. Igarashi:** Mean winds in the mesopause region observed by MF radars at 31° and 45°N 1081

A. H. Manson, C. E. Meek and **G. E. Hall:** Correlations of gravity waves and tides in the mesosphere over Saskatoon 1089

D. L. Hysell: Imaging coherent scatter radar studies of bottomside equatorial spread *F* 1109

J. O. Adeniyi and **S. M. Radicella:** Variation of bottomside profile parameters B0 and B1 at high solar activity for an equatorial station 1123

O. Saka, T. Kitamura, H. Tachihara, M. Shinohara, N. B. Trivedi, G. D. Reeves and **T. L. Hansen:** Amplitude modulation of the equatorial electrojet (EEJ) during a magnetospheric storm 1129

R. J. Pirjola: Modelling the electric and magnetic fields at the Earth's surface due to an auroral electrojet 1139

W. K. M. Rice and **A. R. W. Hughes:** Whistlers, Trimpis and evidence that electron precipitation may trigger atmospheric discharges 1149

G. I. Pugacheva, D. M. Boscher, A. A. Gusev, I. M. Martin and **W. N. Spjeldvik:** On synchrotron radiation energy losses of trapped magnetospheric electrons 1159

Number 12

M. Gadsden: The North-West Europe data on noctilucent clouds: a survey 1163

Ch. Jacobi, R. Schminder and **D. Kürschner:** Non-linear interaction of the quasi 2-day wave and long-term oscillations in the summer midlatitude mesopause region as seen from LF D1 wind measurements over Central Europe (Collm, 52°N, 15°E) 1175

C. J. Rodger, J. R. Wait, R. L. Dowden and **N. R. Thomson:** Radiating conducting columns inside the Earth–ionosphere waveguide: Application to red sprites 1193

E. L. Afraimovich, K. S. Palamartchouk and **N. P. Perevalova:** GPS radio interferometry of travelling ionospheric disturbances 1205

N. F. Blagoveshchenskaya, M. Yu. Chernyshev and **V. A. Kornienko:** Excitation of small-scale waves in the F region of the ionosphere by powerful HF radio waves 1225

S. M. Grach, M. M. Shvarts, E. N. Sergeev and **V. L. Frolov:** Broad continuum feature of stimulated electromagnetic emission 1233

D. S. Kotik and **M. A. Itkina:** On the physical limit of the power of heating facilities..... 1247

D. S. Kotik and **E. N. Ermakova:** Resonances in the generation of electromagnetic signals due to the thermal cubic nonlinearity in the lower ionosphere..... 1257

V. V. Vas'kov, N. I. Bud'ko, O. V. Kapustina, Yu. M. Mikhailova, N. A. Ryabova, G. L. Gdalevich, G. P. Komrakov, A. N. Maresov: Detection on the Intercosmos-24 satellite of VLF and ELF waves stimulated in the topside ionosphere by the heating facility 'Sura' 1261

Number 13

Editorial..... 1277

A. D. M. Walker: Excitation of magnetohydrodynamic cavities in the magnetosphere..... 1279

R. G. Rastogi: Storm sudden commencements in geomagnetic H, Y and Z fields at the Equatorial Electrojet Station, Annamalainagar..... 1295

P. R. Fagundes, J. A. Bittencourt, Y. Sahai, H. Takahashi and **N. R. Teixeira:** Plasma drifts inferred from thermospheric neutral parameters during geomagnetic storms at 23° S 1303

G. D. Earle, R. L. Bishop, Q. H. Zhou and **S. P. Wallace:** A comparative study of *in-situ* and remote intermediate layer measurements against wind model predictions of vertical ion drift 1313

V. M. Sorokin, V. M. Chmyrev and **N. V. Isaev:** A generation model of small-scale geomagnetic field-aligned plasma inhomogeneities in the ionosphere 1331

E. S. Belenkaya: High-latitude ionospheric convection patterns dependent on the variable IMF orientation 1343

Number 14

SPECIAL ISSUE

CEDAR PROGRAM REVIEW ARTICLES

M. Mendillo: Guest editorial..... 1355

C. McLandress: On the importance of gravity waves in the middle atmosphere and their parameterization in general circulation models 1357

H. Rishbeth: How the thermospheric circulation affects the ionospheric F2-layer..... 1385

S. Chakrabarti: Ground based spectroscopic studies of sunlit airglow and aurora..... 1403

R. W. Smith: Vertical winds: a tutorial..... 1425

Number 15

F. Märcz and **P. Bencze:** Surplus of negative charge flow in point-discharge current as shown by variations on different time scales at Nagycenk station 1435

M. Friedrich, D. E. Siskind and **K. M. Torkar:** HALOE nitric oxide measurements in view of ionospheric data 1445

S. B. Malinga, L. M. G. Poole and **R. A. Vincent:** Simultaneous observations of atmospheric summer tides at Grahamstown (South Africa) and Adelaide (Australia) 1459

R. G. Rastogi: Disturbance diurnal electric field in Indian and American equatorial electrojet regions 1471

A. Tan: Atmospheric conditions in 1995 from the orbital decay of the ODERACS II spheres .. 1477

K. Omidvar, R. Menard and **M. J. Buonsanto:** Empirical determination of the O^+O collision frequency 1485

D. Nunn, K. Baba and **M. Hayakawa:** VLF Trimpi modelling on the path NWC-Dunedin using both finite element and 3D Born modelling 1497

L. A. Dremukhina, A. E. Levitin and **V. O. Papitashvili:** Analytical representation of IZMEM model for near-real time prediction of electromagnetic weather 1517

Number 16

G. Vijayakumar, K. Parameswaran and **R. Rajan:** Aerosols in the atmospheric boundary layer and its association with surface wind speed at a coastal site 1531

R. M. Worthington: Tropopausal turbulence caused by the breaking of mountain waves 1543

E. Kudeki and **S. J. Franke:** Statistics of momentum flux estimation 1549

A. A. Ioltukhovski and **M. Ya. Marov:** Spectral remote sensing of the atmosphere by the occultation of stars: retrieval of the constituents and evaluation of the refraction effect 1555

C. Y. She and **R. P. Lowe:** Seasonal temperature variations in the mesopause region at mid-latitude: comparison of lidar and hydroxyl rotational temperatures using WINDII/UARS OH Height profiles 1573

U. Engels and **N. Olsen:** Computation of magnetic fields within source regions of ionospheric and magnetospheric currents 1585

Y. Sahai, P. R. Fagundes, J. A. Bittencourt and **M. A. Abdu:** Occurrence of large scale equatorial F-region plasma depletions during geo-magnetic disturbances 1593

E. Sonnenschein, N. Blaunstein and **D. Censor:** HF ray propagation in the presence of resonance heated ionospheric plasmas 1605

Number 17

G. Sonnemann: Comment on "Does the correlation between solar cycle lengths and Northern Hemisphere land temperatures rule out any significant global warming from greenhouse gases?" by Peter Laut and Jesper Gundermann 1625

F. J. Martín-Torres, M. A. López-Valverde and **M. López-Puertas:** Modelling of the non-LTE populations of the nitric acid and methane vibrational states in the middle atmosphere 1631

H. Takahashi, P. P. Batista, R. A. Buriti, D. Gobbi, T. Nakamura, T. Tsuda and **S. Fukao:** Simultaneous measurements of airglow OH emission and meteor wind by a scanning photometer and the MU radar..... 1649

Q. H. Zhou: Two-day oscillation of electron concentration in the lower ionosphere 1669

J. Y. Liu, C. C. Hsiao, L. C. Tsai, C. H. Liu, F. S. Kuo, H. Y. Lue and **C. M. Huang:** Vertical phase and group velocities of internal gravity waves derived from ionograms during the solar eclipse of 24 October 1995..... 1679

N. T. Afanasiev, A. A. Zheonyk, V. I. Sazhin, M. V. Tinin and **M. K. Ivelskaya:** Effects of large-scale clouds of ionospheric irregularities on the propagation of high-frequency radio waves 1687

S. A. Synnes, F. Søraas and **J. P. Hansen:** Monte-Carlo simulations of proton aurora..... 1695

V. M. Silbergleit: On the statistics of maximum sunspot numbers 1707

Number 18

K. Zhou and **C. J. Butler:** A statistical study of the relationship between the solar cycle length and tree-ring index values..... 1711

P. Laut and **J. Gundermann:** Solar cycle length hypothesis appears to support the IPCC on global warming..... 1719

M. I. Pudovkin and **A. L. Morozova:** Time variation of atmospheric pressure and circulation associated with temperature changes during Solar Proton Events..... 1729

A. Luts: Temperature variation of the evolution of positive small air ions at constant relative humidity..... 1739

Z. N. Begum: Scattering of solar radiation by aerosol particulates in the atmosphere: a theoretical approach validated with Pre-INDOEX 1751

J. W. Krzyńścin, M. Degórska and **B. Rajewska-Więch:** Seasonal acceleration of the rate of total ozone decreases over Central Europe: impact of tropopause height changes..... 1755

M. Gadsden: Noctilucent clouds seen at 60° N: origin and development 1763

B. R. Clemesha, D. M. Simonich, P. P. Batista and **I. S. Batista:** Lidar observations of atmospheric sodium at an equatorial location..... 1773

D. Labendz: Investigation of Schumann resonance polarization parameters 1779

H. Volland: Comments on "Atmospheric Tides" by A. Palumbo 1791

A. Palumbo: Reply to comments on "Atmospheric Tides"..... 1793
